I would like to start, by saying thank you to all the community council for your help and support over the last year. Also thank you to the parish council, trustees and the community for bearing with us, whilst we sorted ourselves out.

At the end of this meeting last year there was no community council, but one month later we had a full committee. It took us several months to change things over, sort though the paperwork and bring things up to date. Straight away we had a full fire inspection which shown up a few issues which were promptly dealt with, with Ken Allan's help, thank you Ken. Another light switch was put outside the table store for safety reasons. All the halls electrics were tested and have been done ~~so~~ again this week. Also The hall heater is now working.....The first aid kits were renewed, the cleaning equipment colour coded, the hall was spring cleaned last June and another one is shortly being planned, the curtains were laundered, a baby changing unit was installed in the disabled cubicle. We have also recently signed up with the same company as the Pc to help us though the new data protection regulations. Our first fundraiser was the successful burns night supper our thanks to Mandy for organising this and to all the other helpers on the day. The cc has recently worked alongside the parish council helping to prepare the play area and playing field ready for its refurbishment. Which has now taken place. We hope to continue working side by side with the trustees and parish council, for the better of the hall and local community. Thank you to Rory who has helped us get the field back flat after the caravan club visit and everything else you have done for us, especially the many hours spent on the cricket pitch. Thank you all again, for what I can say has been a challenging year for us. But we have come though with your support and have several more events planned in your hall. Because it is your hall and we work to maintain it not only for ourselves, the local community but the wider community and future generations to come. Events coming up include a traditional village fete and a Family new years eve band and buffet, plus a few others still in the early stages. Please speak to myself, louise or any other community council member, if you have any questions, suggestions for events or wish to help in anyway or even to join us. I am going to finish how I started by saying thank you, to you all. Thank you.
